PRODUCT DESCRIPTION:

The LPDA-A0100 is medium-gain wideband directional LPDA antenna and covers the frequency band from 30 MHz to 500 MHz.

This antenna is constructed using a unique wire technology. This makes the antenna lightweight and allows for very compact storage, quick, easy deployment and mounting. The flexible nature of this antenna makes it very easy to collapse the antenna and break off any accumulated ice.

All antenna elements are permanently attached to the boom, to prevent any parts from becoming lost in the field.
