Figure 2: Full Antenna in stowed configuration

| Environmental: designed to meet the following specifications |                            |
|--|----------------------------|
| Wind survival  | 120 km/h                   |
| Temperature (operational)                                    | -35 °C to 71 °C            |
| Temperature (storage)  | -35 °C to 71 °C            |
| Exposed materials  | Aluminium, stainless steel |

# Wideband Modular Foldable LPDA Antenna

30 – 512 MHz

### Product Code: LPDA-A0158

#### SPECIFICATIONS:

| Product codes:                          |  |
|---|--|
| LPDA-A0158                              | 7/16 female connector                  |

| Feed power handling                     | ************************************** |
| LPDA-A0158                              | 1000 W                                 |
| LPDA-A0158-01                           | 600 W                                  |
| LPDA-A0158-02                           | 2000 W                                 |
| Gain                                    | See gain graph                         |
| Polarisation                            | Adjustable (vertical or horizontal)    |
| Mechanical:                             |  |
| Dimensions (full assembly -             | 4810 mm x 182 mm x 5350 mm             |
| deployed)                               | 4610 11111 x 162 11111 x 5550 11111    |
| deployed)                               |  |
| Dimensions (High Frequency              | 1521 mm x 125 mm x 1775 mm             |
| section - deployed)                     |  |
|   |  |
| Dimensions (full assembly -             | 4810mm x 182 mm x 590 mm               |
| stowed)                                 |  |
| <b>D</b>                                | 4504 405 500                           |
| Dimensions (high frequency              | 1521 mm x 125 mm x 590 mm              |
| section - stowed)                       |  |
| Total mass                              | < 28 kg excluding isolating pole       |
|   | < 43 kg including isolating pole       |
| Mounting method                         | On a swivel bracket fitted to the      |
|   | mast (requires isolation pole to       |
|   | change polarisation which is           |
|   | standard issue)                        |
|   |  |

#### **PRODUCT DESCRIPTION:**

The LPDA-A0158 is medium-gain wideband directional LPDA antenna and covers the frequency band from 30 MHz to 512 MHz.

The antenna has a modular design which allows the user to deploy either the full assembly or the high frequency section only, depending on the mission requirements.

This antenna has foldable elements which makes the antenna easy to stow and deploy. There are no loose parts and no tools required to deploy the antenna. This makes the antenna ideal for tactical applications as well as for use in harsh environments and installations where there is limited space for operators to manoeuvre.

All antenna elements are permanently attached to the boom, to prevent any parts from becoming lost in the field.
