PRODUCT DESCRIPTION:

The MONO-A0064 is a high-power wideband monocone-type antenna designed for high-power applications in the 500 to 6000 MHz frequency band.

The antenna has a consistently low VSWR across the entire frequency band. It can handle full rated power continuously at all frequencies, making it ideal for all 100% duty-cycle applications.

The antenna is designed for low profile mounting to a vehicular platform and its high strength housing is impervious to shocks, vibration and solvents.
