

# Collapsible Mast

Product Code: MAST-A0001

VERSION: 2.9

## SPECIFICATIONS:

<b>Mechanical:</b>	
Deployed length	10 m
Retracted length	< 2.1 m
Largest pipe diameter	101.6 mm
Weight	24 kg
<b>Environmental: designed to meet the following specification</b>	
Wind resistance	160 km/h (without ice)
Temperature (operational)	-30 to +70 °C
Deployment time	10 minutes typical
Colour	Olive green

## PRODUCT DESCRIPTION:

This mast is rugged and quick to deploy. It consists of five fibreglass sections that are deployed telescopically and one fibreglass section that fits onto the top of the mast.

The design of the mast allows the mast to be collapsed to a convenient size for carrying. The total weight of the mast in the bag 24 kg, and as it is supplied with a rugged canvas bag, it is possible for one person to carry.

The mast is supplied with guy ropes and stainless steel ground pegs that enables a 10 minute erection of the mast by two to three people.

The mast is fitted with dust scrapers at each section to prevent dust and sand particles from entering the mast. This ensures that the telescoping action remains smooth and effortless throughout the products lifetime.

## PRODUCT FEATURES:

- High strength
- Telescopic
- Quick assembly time
- Lightweight
