

# Lightweight Tactical Mast

VERSION: 1.1

Product Code: MAST-A0003

## SPECIFICATIONS:

<b>Product Codes:</b>	
MAST-A0003	9m version
<b>Mechanical:</b>	
Dimensions:	
Erected length: MAST-A0003	9 m
Packed length	1.1 m
Diameter	44.5 mm
Total mass (mast only): MAST-A0003	< 13 kg
Total mass (with accessories): MAST-A0003	< 17 kg
Head weight	6 kg
Top diameter	39 mm
Colour	green, other on request
<b>Environmental: designed to meet the following specifications</b>	
Wind survival	120 km/h (160 km/h gusts)
Temperature range	Storage: -41 °C to +71 °C. Operation -31 °C to +55 °C
Designed to meet MIL-STD-810F	

## PRODUCT FEATURES:

- Lightweight
- Compact
- Quick deployment

## APPLICATIONS:

- Short- to medium-term base station communications
- Forward command communications

## PRODUCT OVERVIEW:

The MAST-A0003 mast is lightweight, man-portable and ideal for elevating lightweight/wire antennas for short to medium term base station or forward command communications applications.

The mast is suitable for use with any lightweight, low wind area antenna.

The mast has interlocking sections which ensures that the sections do not rotate individually. The mast sections are interchangeable, thus allowing for sections to be removed if required.

The mast is packed complete with all accessories:

- baseplate
- guy ropes
- mallet
- anchor pegs
- carry bag
- easily deployed by two persons in less than 5 minutes.
