v1.0.0

Software option for more functions

Frequencyoption   10 kHz
If the standard step size of 100 KHz is no longer sufficient, a software option can be purchased.

Pulsoption 1 fast   1 .. 24 μs
Pulsoption 2 slow   .. 998 ms
If faster pulses or slower pulses are required, there is an appropriate option

Phase shifting   0 .. 360 ° in 0.7 Steps
For combining several generators there is the phase shift option, which makes it possible to combine several generators using the 10 MHz reference

GPO Option   GPO on RF Status PIN
If a configurable output is desired instead of status pin.
Configurable from 0.1 to 10 V.

You will receive the software option code from us after purchasing it, which is tied to the serial number of the device.

If you miss an option, just ask us
